

Manufactured by Chemstore, Firevault brings you the next generation of storage solutions for your flammable materials.

The Firevault range scales from entry level reach in storage solutions for small drums and modular walk-in units for IBCs and larger containers.

Backed by a 10 year structural guarantee each Firevault system may be combined with an extensive range of optional accessories to suit individual requirements and specific applications.

### Key Features:

- ⊕ Best in class solution for secondary containment of flammables.
- ⊕ Up to four hour rated composite wall panels. Tested to BS 476, part 22.
- ⊕ Self closing fire doors.
- ⊕ Intumescent ventilation panels, that shut and seal in the event of fire.
- ⊕ Compartmentalised, leakproof spillage collection sumps; tested and certified.
- ⊕ Fixed shelving.
- ⊕ Grounding connections.
- ⊕ Powered ventilation, lighting and heating or cooling options.

**Firevault units guarantee a safer workplace for you and your employees.**

“The Firevault brand is becoming synonymous with industry best practice in flammables storage.”

Firevault is part of Chemstore's family of solutions for the safe storage of hazardous, toxic and corrosive materials and gases.

The range has been designed with modularity, flexibility and security in mind. This approach enables the design and supply of standard, scalable systems or highly customised fire rated solutions comprising the latest ventilation and temperature control technology.

Chemstore Connect provides an advanced software tool for the seamless management of an organisation's hazardous material; improving compliance, lowering costs, and reducing risk.

The complete Chemstore family of products meets the strict safety, quality and certification requirements of the markets in which we operate.
